

## A SPECTRUM OF CONFLICT

◆ Operations with no or limited risk of violence

Example: **Kosovo today**

◆ Operations with high risk of violence, but of low-intensity

Example: **Afghanistan today**

◆ Operations with high risk of violence, but of medium intensity

Example: **Afghanistan and Iraq then**

◆ Operations of high risk of violence and of high intensity

Example: **Korea and Kuwait then**

◆ Operations of high risk of violence and of extreme intensity (No distinction between global and theater nuclear threats because of escalation) **Example: None.**

**Because of the threat of nuclear escalation, there no longer is an example of this part of the spectrum. Earlier, one could speak of WWI or WWII.**

Why no mention of limited war?
